Project Description:

This quiz game project features two rounds: Calm and Wild. The user must pass the Calm Round to access the more challenging Wild Round. There are no penalties for wrong answers. In the Calm Round, questions cover general knowledge in science, technology, movies, sports, and health, while the Wild Round focuses on computer-related knowledge. The user faces three questions in a warm-up round, needing to answer at least two correctly to progress. In the Wild Round, each correct answer earns Rs 10,000, but one wrong answer results in elimination. The game ends when the user's winnings reach Rs 1 Lakh. Each question offers four choices: A, B, C, and D.

Functions Used:

We have broken this mini project into several functions, and we have highlighted few of them below.

- Edit_score()- adds the current cash prize won to the previous one upon giving the right answer to a question.
 - Help()- help menu with game summary and rules for better understanding of user.
 - Reset_score()- to reset the highest score/cash prize to default.
 - Show_record()- shows the highest cash prize won by a particular user.
 - Show_score()- to view the highest score.
-
